I am a recent graduate from the University of Utah's Coding Boot Camp. Although I have a master's degree in accounting, programming is my passion. I have developed a fundamental knowledge of the MERN stack among other languages and frameworks. I am a motivated employee with years of team experience and complex problem solving skills. I am seeking mentorship and for the opportunity to utilize my analytical, technical, and programming skills in order to thrive as a software-engineer.

Projects

SubscripZen   Developer

- An application that allows users to easily keep track of online subscriptions
- This project makes use of the MERN Stack, GraphQL, and was designed with a stylish UI. I executed the idea from start to finish with minimal help from others.

Ethical Social Media   Developer

- A take on a whimsical social media Platform
- This project utilized SQL, node, and REST APIs for the back end and handlebars and JavaScript for the front end. I designed the database and implemented the back-end of the code.

Professional Experience

Pupford, LLC   Pleasant Grove, UT
Head Accountant   May 2020 – Present

- Evaluate company performance and provide suggestions by analyzing company operations
- Assist in running company operations and managing inventory
- Create yearly/monthly forecasts and budgets

KPMG, LLC   New York City, NY
Intern Auditor   Jan 2020 – April 2020

- Performed analytical and substantive test work for multiple Fortune 500 companies
- Trained in audit software, confidentiality, professional communication, and team skills
